EDUCATION

National University of Singapore (NUS)

PhD in Computer Science (HCI), Advisor: Prof. Yi-Chieh (EJ) Lee

Singapore

Jan 2025 – Present

- **Research Direction:** AI in Education (AIED), AI-Assisted Decision Making, AI-Mediated Communication

National University of Singapore (NUS)

M.Comp. in Artificial Intelligence, GPA: 4.67/5.0

Singapore

Aug 2023 – Dec 2024

Zhejiang University, Chu Kochen Honors College

B.Eng. in Computer Science, Top 5%

Hangzhou, China

Sep 2019 – Jun 2023

- **Honors & Awards:** ZJU First Class Scholarship; Outstanding Student (three consecutive years)

PUBLICATIONS

Who You Explain To Matters: Learning by Explaining to Conversational Agents with 2026 Different Pedagogical Roles

Zhengtao Xu, Junti Zhang, Anthony Tang, Yi-Chieh Lee

Proceedings of the ACM CHI Conference on Human Factors in Computing Systems (CHI '26). 🏆 **Honourable Mention Award**

InterPilot: Exploring the Design Space of AI-assisted Job Interview Support for HR Professionals 2026

Zhengtao Xu, Zimo Xia, Zicheng Zhu, Nattapat Boonprakong, Yu-An Chen, Rabih Zbib, Casimiro Pio Carrino, Yi-Chieh Lee

Extended Abstracts of the ACM CHI Conference on Human Factors in Computing Systems (CHI '26 EA). Poster

Confronting Verbalized Uncertainty: Understanding How LLM's Verbalized Uncertainty Influences 2025 Users in AI-Assisted Decision-Making

Zhengtao Xu, Tianqi Song, Yi-Chieh Lee

International Journal of Human-Computer Studies (IJHCS)

RESEARCH PROJECTS

AI in Education: Learning by Explaining with LLM Agents

2025 – Present

National University of Singapore

- Investigating how the pedagogical role of a conversational agent reshapes the cognitive and social dynamics of learning-by-teaching
- Designed role-differentiated LLM agents (Peer, Challenger, Tutee) and evaluated them through a controlled between-subjects study (n=96)
- Published at ACM CHI 2026 with an **Honourable Mention Award**

AI-assisted Tool for Supporting HR Professionals in Real-Time Interviews

2025 – Present

National University of Singapore (industry collaboration with **Avature**)

- Conducted a formative study with HR professionals to surface interviewing practices, pain points, and concrete AI support needs in high-stakes, synchronous settings
- Designed and implemented an end-to-end system providing real-time transcription, adaptive probing suggestions, and structured skill-evidence recording
- Evaluated the system through a user study with HR practitioners; planned for integration into future HR platform

AI Uncertainty in Decision Making

2023 – 2025

National University of Singapore

- Examined how LLMs' verbalized uncertainty shapes human trust, reliance, and decision quality in AI-assisted settings via a between-subjects experiment
- Published in the *International Journal of Human-Computer Studies*

Zhejiang University

- Reproduced Mip-NeRF 360 as the backbone and integrated SAM for image segmentation and LaMa for image completion to improve input quality and reconstruction fidelity
- Achieved sharper view synthesis and faster training on unbounded outdoor scenes

SKILLS

Programming: Python, C/C++, JavaScript, SQL

Tools: LaTeX, D3.js, Figma

Languages: English (fluent), Mandarin (native)

OTHERS

Teaching Assistant, National University of Singapore:

- CS5228 Knowledge Discovery and Data Mining (25/26 Sem 1)
- CP2107 Independent Introduction to CS Research (25 Summer, 26 Summer)
- CS5346 Information Visualization (25/26 Sem 2)
- CS3249 Conversational User Interface (26/27 Sem 1)

Reviewer: ACM DIS 2026, IJHCS
